

AMENDMENTS TO THE CLAIMS

Please add new claim 20.

1. (CURRENTLY AMENDED) A server comprising:

a questionnaire generator for (i) generating a questionnaire comprising (a) one or more questions for determining an expression of risk for an individual and (b) a first number of answer options to each of said questions, wherein said expression of risk concerns at least one of a physical condition of said individual, a mental condition of said individual, and a behavior of said individual, (ii) associating each of said answer options with one of a second number of values representing a level of risk, said second number of values being greater than said first number of answer options and (iii) transmitting said questionnaire from said server to an apparatus, wherein said apparatus is (a) associated with said individual and (b) remotely located from said server;

~~a three dimensional data structure, wherein a first dimension represents database in a storage medium and indexed by (i) an aspect of care, a second dimension represents (ii) said expression of risk and a third dimension represents (iii) said level of risk; and~~

a profile generator for (i) generating a profile for said individual based on one or more of said aspects of care, said expression of risk and said level of risk associated with said individual and (ii) assigning a subsequent program to said individual based on said profile.

2. (PREVIOUSLY PRESENTED) The server of claim 1, wherein said profile of said individual is updated based on one or more follow-up responses.

3. (PREVIOUSLY PRESENTED) The server of claim 1, wherein (i) said profile further comprises a language of said individual, and a current health condition of said individual and (ii) said questionnaire generator also tailors said questionnaire in dependence upon said language and said current health condition of said individual.

4. (PREVIOUSLY PRESENTED) The server of claim 1, wherein said questionnaire generator further generates a motivational profile and a comprehension capacity profile of said individual based on one or more answers.

5. (PREVIOUSLY PRESENTED) The server of claim 1, wherein said subsequent program comprises:

a request for additional responses; and
educational information.

6. (PREVIOUSLY PRESENTED) The server of claim 5, wherein said educational information is received by said server from an external source.

7. (PREVIOUSLY PRESENTED) The server of claim 1, wherein data relating to said physical condition of said individual comprises one or more measurements received by said server from a monitoring device connected to said apparatus.

8. (PREVIOUSLY PRESENTED) The server of claim 1, wherein data relating to said physical condition of said individual comprises medical claims received by said server from a medical claims paying organization associated with said individual.

9. (PREVIOUSLY PRESENTED) The server of claim 1, wherein data related to said physical condition of said individual comprises electronic medical records received by said server from a services organization associated with said individual.

10. (CURRENTLY AMENDED) A method for providing customized health information to an individual, said method comprising the steps of:

(A) generating a questionnaire comprising (i) one or more questions for determining an expression of risk for said individual and (ii) a first number of answer options to each of said questions, wherein said expression of risk concerns at least one of a physical condition of said individual, a mental condition of said individual, and a behavior of said individual;

(B) associating each of said answer options with one of a second number of values representing a level of risk, wherein said second number is greater than said first number;

(C) transferring said questionnaire from a server to an apparatus, wherein said apparatus is (i) associated with said individual and (ii) remotely located from said server;

(D) generating a ~~three dimensional~~ data structure, ~~wherein a first dimension represents~~ database in a storage medium and indexed by (i) an aspect of care, ~~a second dimension represents~~ (ii) said expression of risk and ~~a third dimension represents~~ (iii) said level of risk;

(E) generating a profile for said individual based on one or more of said aspects of care, a plurality of responses to said questions, said expression of risk and said levels of risk associated with said individual; and

25 (F) assigning a subsequent program to said individual based on said profile.

11. (PREVIOUSLY PRESENTED) The method of claim 10, further comprising the step of:

updating said profile after said server receives one or more follow-up responses.

12. (PREVIOUSLY PRESENTED) The method of claim 10, further comprising the steps of:

registering a language of said individual, and a current health condition of said individual in said server; and

5 tailoring said questionnaire to said individual in dependence upon said language and said current health condition of said individual.

13. (PREVIOUSLY PRESENTED) The method of claim 10, wherein said subsequent program comprises:

a request for additional responses; and
educational information.

14. (PREVIOUSLY PRESENTED) The method of claim 13, wherein said educational information is received by said server from an external source.

15. (PREVIOUSLY PRESENTED) The method of claim 10, further comprising the step of:

generating a report comprising said profile.

16. (PREVIOUSLY PRESENTED) The method of claim 10, wherein data relating to said physical condition comprises one or more measurements received by said server from a monitoring device connected to said apparatus.

17. (PREVIOUSLY PRESENTED) The method of claim 10, wherein data relating to said physical condition of said individual comprises medical claims received by said server from a medical claims paying organization associated with said individual.

18. (PREVIOUSLY PRESENTED) The method of claim 10, wherein data relating to said physical condition of said individual comprises electronic medical records received by said server from a services organization associated with said individual.

19. (PREVIOUSLY PRESENTED) A storage medium for use in a server to communicate with one or more patient devices, the storage medium recording a computer program that is readable and

executable by the server, the computer program comprising the steps
5 of:

(A) displaying a plurality of icons of a plurality of questions, a plurality of answers and a plurality of follow-up actions;

10 (B) receiving a selection to each of a particular question of said questions, a particular answer of said answers and a particular follow-up action of said follow-up actions from a user;

(C) linking said icons of said particular question, said particular answer and said particular follow-up action; and

15 (D) converting said linked icons into a subsequent program; and

(E) transmitting said subsequent program to said one or more patient devices over a communication network.

20. (NEW) The storage medium of claim 19, wherein the computer program further comprises the step of:

5 defining a position of said particular answer along a risk scale ranging from a low risk value to a high risk value.
